

OLUWAFEMI DAVID

Software Engineer | AI Quality Assurance Engineer

Phone: 2348116585993 | Email: davidoluwafemi178@gmail.com | Github: github.com/jay-davisphem

EDUCATION

OBAFEMI AWOLOWO UNIVERSITY, Ile-Ife, Osun, Nigeria

April 2019 - December 2025

Bachelor of Science in Computer Engineering(CGPA: 4.45/5.00, Second Class Upper Honours)

EXPERIENCE

AI Model Quality Analyst | Turing

Feb 2025 - Present

- Trained and tuned machine learning models for optimal performance
- Reviewed and analysed model code to ensure quality and compliance
- Curated, annotated, and supplied datasets for model development and improvement
- Led debugging and troubleshooting efforts for models and code
- Ensured synchronization between data, model, and engineering teams
- Documented review findings and training processes for future reference

System Engineer | Africa Centre of Excellence - OAU ICT-Driven Knowledge Park

March 2024 – Sep 2024

- Built an Arduino-based motor-controlled robot using DC motors and H-Bridge circuits
- Programmed and debugged motion control; developed real-time monitoring UI
- Developed an ESP32-powered smart electricity monitor with PZEM modules
- Created a React.js frontend integrated with Firebase for real-time analytics and authentication
- Designed circuits, integrated hardware/software, and programmed embedded systems
- Deployed IoT solutions and led debugging/synchronization of hardware and software

ReactJS Frontend Lead | [Sandsstores](https://sandsstores.com), Pennsylvania, USA · Remote,

April 2023 – Jan 2024

- Led front-end development for Sandsstores, an e-commerce platform using Next.js, Tailwind CSS, and Zustand.
- Successfully deployed on Vercel with AWS S3 integration.
- Designed intuitive UIs, enhancing user experience and driving engagement.
- Addressed and resolved complex development challenges, improving site performance and user satisfaction.
- Seamlessly handled front-end deployment, with custom domain setup on sandsstores.com.

Software Engineer Intern | Zuri Inc | Lagos, Nigeria:

May 2022 – Aug 2022

- I coordinated about 10 other technical interns towards the development of a Favicon Generator web app.
- Managed 2 projects on github, fixing and resolving conflicts in code
- Developed the database schema of the Favicon Generator web app
- Prototyped a solution for migrating data to the cloud, including automating the creation and storage of the PostgreSQL database.

LANGUAGES, TECHNOLOGIES, AND TOOLS

- **Languages:** Python, JavaScript, TypeScript
- **Frameworks:** Express.js, Django, Django Rest Framework, React, Next.js
- **Databases/ORMs:** PostgreSQL, MySQL, MongoDB (Mongoose), IBM DB2, Microsoft SQL Server
- **DevOps/Tools:** Git, Docker, AWS, Azure, Firebase, Redis, Celery, Postman, Datadog, IBM Infosphere
- **Others:** Linux, GraphQL, Open API documentation, Arduino, FPGA, Raspberry Pi.

TRAINING, CERTIFICATES AND BADGES

- [Developing Cloud Apps with Node.js and React](#) [PYTHON foundational](#) [Introduction to Cloud Computing](#) - IBM
- [Jobberman Accelerated Soft Skills Training](#) - Jobberman
- [Divide and Conquer, Sorting and Searching, and Randomized Algorithms](#) - Stanford University
- [Computer Science and Bitcoin for everybody certificate](#) - Saylor Academy

ORGANIZATIONS

- Microsoft Learn Student Ambassadors Community, OAU, Association Of Computing Machinery, Google Developer Student Club, OAU, DSA WolfStation Alumni, Saylor Academy
